

SANDFIRE
RESOURCES NL

Environmental Policy Statement

Sandfire Resources NL is a successful and emerging resources company with interests in exploration, project development, mining, and processing in Australia and internationally.

Sandfire recognises that some of these activities will impact directly and indirectly on the local environments and communities, and is committed to undertaking its activities in a sustainable and socially responsible manner to minimise and mitigate these impacts.

To achieve this Sandfire is committed to:

- Companywide expansion of DeGrussa's Environmental Management System to encourage environmental protection through proactive environmental management and compliance with statutory requirements, as a first step to embracing Sustainability as a core Company value.
- The development of Environmental Standards for use across all Company activities including design, exploration, planning, development, operations, and closure/decommissioning.
- Including consideration of emissions and climate change impact in significant project development and design, as well as setting goals going for minimising these emissions and impacts in existing activities where appropriate.
- Assessing and appropriately managing issues related to pollution and waste generation and the use of the key resources of energy and water. This will be undertaken by identifying objectives and setting targets, monitoring and measuring of impacts and use, and undertaking independent audits on a scheduled basis.
- Undertaking rehabilitation and recovery of disturbed areas in a timely manner, consistent with industry standards, regulatory requirements and relevant guidelines.
- Providing appropriate training and communication to employees and contractors on matters related to Environmental Management and the importance of natural resource protection including soils, vegetation, water, energy, waste and mineral products / by-products.
- Providing opportunity for the development and implementation of innovative and sustainable options through a process of continuous improvement.
- Effectively communicating with stakeholders, regulatory authorities, employees and community on overall environmental performance and progress in environmental management.
- Undertaking management reviews in a timely manner to ensure the management of Sandfire are up to date with all aspects of environmental management at Sandfire.

Karl Simich
Chief Executive Officer
